

JHANS JHONNATAN TIMANÁ JUÁREZ

SENIOR JAVA BACKEND ENGINEER | QUARKUS • SPRING BOOT • KAFKA • DISTRIBUTED SYSTEMS

Peru • +51 912 836 949 • timanajhans@gmail.com • [Linkedln](#)

PROFESSIONAL SUMMARY

Senior Java Backend Engineer with 6+ years of experience building backend systems across banking, telecommunications, e-commerce, education, and public-sector platforms. Experienced with Java, Quarkus, Spring Boot, Spring WebFlux, Kafka, Kubernetes/AKS, Azure, AWS, API design, security, observability, and automated delivery. Currently focused on reusable backend libraries, Quarkus extensions, performance analysis, and technical enablement for multiple engineering squads in a banking environment.

CORE SKILLS

Backend	Java, Quarkus, Spring Boot, Spring WebFlux, RxJava, Jakarta EE, REST APIs, GraphQL
Architecture	Microservices, Event-Driven Architecture, Saga, API-First, Design Patterns, reusable frameworks
Messaging & Data	Kafka, Kafka Streams, Redis, PostgreSQL, MongoDB, Oracle PL/SQL, R2DBC
Cloud & Containers	Azure, AWS, AKS, Kubernetes, Docker, OpenShift, Azure Container Apps (ACA)
Security	OAuth2, JWT, MFA/2FA, Spring Security, Azure Key Vault, encryption
DevSecOps & Observability	Jenkins, GitHub Actions, Azure DevOps, Artifactory, SonarQube, Fortify, Grafana, Kibana, Loki, OpenTelemetry
Testing	JUnit, Mockito, integration testing
Integration	OpenAPI, SOAP, RESTCONF, NETCONF, Temporal

PROFESSIONAL EXPERIENCE

NTT DATA Europe & Latam

Java Software Backend Engineer

Lima Metropolitan Area

Oct 2025 – Present

- Develop reusable Java libraries and Quarkus extensions for backend APIs used across multiple engineering squads, emphasizing modularity, maintainability, testability, and performance.
- Validate shared components through performance tests, reviewing heap usage, garbage collection, memory stability, and saturation under load.
- Support Spring-to-Quarkus migrations by resolving technical tickets and integration blockers involving Kafka, Redis, and related platform components.
- Separate framework-related migration issues from existing application technical debt, helping squads identify root causes and remediation.
- Guide squads in the reliable adoption of shared components while respecting banking security and confidentiality requirements.

HRF SAC

Java Software Backend Engineer

Lima Metropolitan Area

Apr 2025 – Sep 2025

- Designed and implemented backend solutions for a large-scale compensation and CRM platform, translating complex business requirements into maintainable services.
- Developed asynchronous Java and Spring Boot services for enterprise CRM and compensation workflows, integrating Azure services with Oracle PL/SQL-based business logic.
- Implemented OAuth 2.0 and MFA-protected authentication flows and secure Azure Blob Storage handling for business-critical files.
- Built Angular components consuming REST APIs and contributed to CI/CD delivery through Azure DevOps within a distributed Scrum team.

THRADEX & TELECOM
Java Backend Software Developer

Lima Metropolitan Area
Aug 2023 – Aug 2024

- Led migration from relational SQL data models to MongoDB, including NoSQL schema design and a dedicated SQL-to-NoSQL transformation service.
- Developed Spring Boot microservices using Factory and Strategy patterns, secured with JWT/OAuth2 and exposed through REST and GraphQL APIs.
- Integrated telecom systems through SOAP, NETCONF, and RESTCONF interfaces and implemented advanced MongoDB aggregation pipelines.
- Containerized services with Docker and deployed workloads on AWS EC2; expanded unit and integration test coverage with JUnit and Mockito.

Tecboss
Java Developer

Piura, Peru
Jun 2020 – Jul 2023

- Built microservice-based backend solutions for electronic billing, e-commerce, online education, notifications, auditing, payments, and configuration management.
- Integrated electronic invoicing with SUNAT and implemented e-commerce capabilities including catalog, shopping cart, payments, user management, JWT security, and Spring Cloud services.
- Implemented asynchronous email/SMS notifications with Kafka, Twilio, and SendGrid; centralized auditing with Elasticsearch and Kibana.
- Developed dynamic business rules with Drools, secure OAuth2 payment integrations with digital-signature validation, and configuration management with Spring Cloud Config and event-driven refresh.
- Worked with PostgreSQL, Oracle PL/SQL, Docker, Azure Data Factory, and Azure Databricks in data and integration workflows.

INGYTAL
Backend Developer

Peru
Jan 2020 – May 2020

- Maintained and enhanced the VUCE foreign-trade application using Java, Spring Boot, and Spring Data.
- Improved backend behavior and database access through PostgreSQL query/schema optimization, while delivering supporting Angular UI enhancements.
- Added unit tests to improve service reliability and regression coverage.

EDUCATION

CESCA Institute — Graduate, Computer Science

Piura, Peru | Mar 2018 – Dec 2021

CERTIFICATIONS & TRAINING

- Microsoft Certified: Azure Fundamentals — Microsoft
- Spring Framework & Spring Boot — Udemy
- Azure Developer Solutions — Udemy
- Spring Boot Microservices — Udemy
- Java Full Course – Master/Advanced — Udemy
- AWS Developer Associate Exam Preparation — Udemy
- Docker & Kubernetes — Udemy
- Spring WebFlux Reactive Programming — Udemy

LANGUAGES

Spanish: Native | **English:** Advanced (C1)
